D. modifiedTime

Answer: B

## Explanation:

https://www.ibm.com/support/knowledgecenter/SSSHRK_4.2.0/tpdb/reference/tpdb_managedstat us.htm
3.Which command will verify that Apache Storm has database access?
A. \$NCHOME/precision/scripts/ncp_storm_validate_dbAccess.sh db
B. \$NCHOME/precision/scripts/ncp_storm_validate.sh db
C. \$NCHOME/precision/scripts/per//scripts/ncp_storm_validate.p1 db
D. \$NCHOME/precision/scripts/sh/scripts/ncp_storrn_validate.sh db

Answer: A

## 4.DRAG DROP

What is the correct sequence of steps for the requirements-gathering phase?
Unordered Options

## Ordered Options

| Identify stakeholders | 1 |
| :---: | :---: |
| Confirm understanding of requirements with stakeholders | 2 |
| Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes | 3 |
| Create a document of understanding that specifies requirements and defines the scope of the project | 4 |
| Document stakeholder requirements and existing processes | 5 |
| Understand what the customer's business does and where they operate | 6 |

## Answer:

## Unordered Options

## Ordered Options

1 Identify stakeholders
2 Confirm understanding of requirements with stakeholders

Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes

Create a document of understanding that
4 specifies requirements and defines the scope of the project

5 Document stakeholder requirements and existing processes

6 Understand what the customer's business does and where they operate
5.A custom discovery stitcher creates a temporary table or array called customData using the Record customData; statement. Since implementing the custom stitcher, the amount of available memory on the ITNM server decreases more than normal while discovery is running.
What is a potential problem?
A. The customData table was not truncated before running the new discovery
B. The stitcher is missing the delete (customData); statement
C. The stitcher is missing the empty (customData); statement
D. The stitcher is missing the end statement on the last line of the stitcher so the stitcher never finishes

Answer: A
