**Exam** : **C2090-621**

**Title** : IBM Cognos Analytics  
Author V11

**Version** : DEMO

1.A customer wants to have a report with a bar chart, which is going to be displayed on a tablet. By changing a filter on the report, the chart should change dynamically. The report output size should be as small as possible.

How can this be achieved?

- A. Create an Active Report using visualizations. Check that the render method is set to Client.
- B. Create an Active Report using visualizations. Check that the render method is set to Server.
- C. Using a legacy chart with a conditional block around it. The block will be switched depending on the selected filters.
- D. Using a default chart with a conditional block around it. The block will be switched depending on the selected filters. Set the render method to Dynamic.

**Answer: B**

2.An author has finished working on a Dashboard and wants to make it available to other authors.

Where should the Dashboard be located?

- A. My content folder
- B. Team content folder
- C. Administration console, Mobile tab
- D. Administration console, Library tab

**Answer: B**

3.A report author wants to nest a chart within a list and filter the chart data to relate to the row of the list that it is displayed in.

How can this be done?

- A. Enable share result set on the list object.
- B. Create a join in the Query explorer to merge the data.
- C. Select the list and define a Master detail relationship.
- D. Select the chart and define a Master detail relationship.

**Answer: D**

4.How can a package be created?

- A. By combining Data modules.
- B. By using content administration.
- C. By publishing from a subset of a model.
- D. By using any valid non-relational Data source.

**Answer: C**
