# PASSTCERT

## QUESTION & ANSWER

## Higher Quality

## Better Service!

**Exam** : **HP2-Z18**

**Title** : Network Infrastructure AIS 2011

**Version** : DEMO

1.You are at the manager level prompt in the CLI of an HP E3500 yl switch. Which options are available at this prompt? (Select two.)

A. assign IP address to VLAN interface

B. enable IP routing

C. restart the switch

D. disable ports

E. update software

**Answer:** C, E

2.Which command entered at the CLI of an HP E3500 yl switch displays dynamic information about traffic transmitted and received on each port?

A. E3500 yl# show interface traffic

B. E3500 yl# show interface all

C. E3500 yl# show interface display

D. E3500 yl# show interface dynamic

**Answer:** C

3.When Spanning Tree Protocol is enabled, which devices receive outbound LLDP advertisements from an HP E-Series switch?

A. those with interfaces in VLAN 1

B. those that receive the switch's broadcasts

C. those that are directly connected to the switch

D. those in the LLDP multicast group

E. those not blocked by Spanning Tree Protocol

**Answer:** C

4.You make configuration changes to the running configuration of your HP E3500 yl switch. Which command saves these changes to your startup configuration?

A. save running-config

B. copy running-config startup-config

C. write memory

D. write config

**Answer:** C

5.You must update the software on an HP E3500 yl    switch. Which devices can be sources for the copy command? (Select two.)

A. USB flash drive

B. management workstation hard drive

C. TFTP server

D. FTP server

E. Compact Flash card

**Answer:** A, C

6.You must determine whether routing has been enabled on an HP E 5406 zl switch. Which commands

provide this information? (Select two.)

A. show interfaces

B. show running-config

C. show vlans

D. show ip route

E. show ip

**Answer:** B, D

7.You must determine whether routing has been enabled on an HP E 5406 zl switch. Which commands provide this information? (Select two.)

```
hostname "E5406"
module 1 type J8702A
vlan 1
    name "DEFAULT_VLAN"
    untagged A9-A24
    ip address 192.168.1.1 255.255.255.0
    no untagged A1-A8
    exit
vlan 5
    name "VLAN5"
    untagged A1-A4
    ip helper-address 192.168.1.2
    ip address 192.168.5.1 255.255.255.0
    exit
vlan 6
    name "VLAN6"
    untagged A5-A8
    ip helper-address 192.168.1.2
    ip address 192.168.6.1 255.255.255.0
    exit
vlan 2
    name "VLAN2"
    ip address 192.168.2.1 255.255.255.0
    exit
snmp-server community "public" unrestricted
spanning-tree
spanning-tree priority 0
```

A. show interfaces

B. show running-config

C. show vlans

D. show ip route

E. show ip

**Answer:** B, E

8.Refer to the exhibit below.

```
E5406# show vlan 100

  Status and Counters - VLAN Information - VLAN 100

    VLAN ID : 100
    Name : VLAN100
    Status : Port-based
    Voice : No
    Jumbo : No

    Port Information Mode       Unknown VLAN Status
    ---------------- ---------  ------------- ----------
    A24              Untagged   Learn          Up

E5406# show vlans port a24

  Status and Counters - VLAN Information - for ports A24

    VLAN ID Name                                    | Status      Voice Jumbo
    ------- ------------------------------------ +  ----------   ----- -----
    100     VLAN100                                 | Port-based  No    No
```

You enter the following command at the switch'¯s CLI
E5406(vlan-100)# no untag a24
Why does this command fail?
A. Port A24 is not a member of VLAN 100.
B. Port A24 must be a member of at least one VLAN.
C. VLAN 100 must have at least one port member.
D. no untag a24 is an invalid CLI command.
**Answer:** B

9.Port B1 on an HP ProCurve 5406zl switch is an untagged member of VLAN 155 and not a tagged
member of any VLAN. Port C1 is a tagged member of VLAN 155 and an untagged member of VLAN 100.
You issue the following command:
5406zl(config)# no vlan 155
Why do you receive the following prompt?
The following ports will be moved to the default VLAN:
B1
Do you want to continue? [y/n]:
A. The CLI always issues this prompt when deleting a VLAN.
B. The CLI will not allow you to orphan a port.
C. The CLI will not delete a VLAN with any port membership.
D. All ports must be moved to the default VLAN before you can delete the VLAN.
**Answer:** B

10.Which security technology requires that you set read/write community names?
A. SFTP
B. SSH
C. SNMP
D. HTTPS
E. SMTP

**Answer:** C

11.You must enable Secure HTTP (HTTPS) to encrypt web-based management traffic on an HP E-Series switch. The switch is at default settings. What must be installed or enabled to apply this solution?
A. web server
B. encryption accelerator
C. digital certificate
D. internal RADIUS server
**Answer:** A

12.A customer requires that each management user of HP switches has a unique user name and password. How can you fulfill this requirement on HP E-Series switches?
A. Add each switch to the customer's Active Directory domain.
B. Use an external RADIUS server for authentication.
C. Enable 802.1X port authentication on each managed switch.
D. Install a Premium License on each managed switch.
**Answer:** B

13.Which remote management interface on an E-Series switch can be secured by enabling Secure Sockets Layer (SSL)?
A. console
B. menu
C. web management
D. Telnet
**Answer:** C

14.You have configured a dynamic LACP four-port trunk connecting two HP E-Series switches. How will the switches share the load over the trunk?
A. The switch that receives the first packet in each conversation will balance the load by ensuring reply packets use a different link.
B. Each switch will assign conversations to links independent of the other switch's selection.
C. The switches will exchange LACP BPDUs to negotiate a load-sharing algorithm.
D. The switches will dynamically calculate the path of least congestion for each conversation.
**Answer:** D

15.Ports 1-4 on an HP E3500 yl switch are tagged members of VLAN 44 and untagged members of VLAN 45. What is the effect of the following command?
E3500(config)#   trunk 1-4 trk3 lacp
A. trk3 becomes a tagged member of VLAN 44 and an untagged member of VLAN 45.
B. trk3 will have no VLAN memberships until they are configured by an administrator.
C. trk3 becomes an untagged member of VLAN 1 and has no other VLAN memberships.
D. trk3 becomes an untagged member of VLAN 1 and a tagged member of VLAN 44.
**Answer:** C
